

How will I be alerted?

Answer – BCARES members are activated via the Bernalillo County Code Red Alerting System. BCARES members receive either a text message, phone call, or email; or, perhaps all three. BCARES members receive a text message or phone call with a recorded message if their cell phone provider is listed in the Activation Roster. The message will instruct the member to monitor one of the BCARES Repeater Network frequencies, 145.13, 145.15, or 442.05 MHz for follow-up instructions. The BCARES activation Network Controller checks-in Net members and requests their availability to respond to the incident. The NCS then announces the time and place of the rendezvous location. BCARES members who anticipate activation are encouraged to monitor one of the BCARES repeater frequencies.
